

# RIDGE PURGE SYSTEM

## EZ-PURGE

- Unique silicone ball design ensures air tight seal of pipe.
- For pipe diameters between 3/4" -8".
- Purge levels achieved in under 2 minutes.
- basic spine withstands up to 450°C.
- Cuts down purging gas & time.

## SILICONE DISC SYSTEM 210

- Achieve an air tight seal in large pipes.
- For pipe diameters between 9" > 34"
- Purge levels achieved in 5 to 15 minutes
- Cylinder design significantly reduces purge volume
- Help achieve a uniform weld profile

## SILICONE DISC SYSTEM 120

- Achieve an air tight seal in straight pipes.
- For pipe diameters between 3/4" -12"
- Purge levels achieved in under 3 minutes
- Help achieve a uniform weld profile
- Helps cut down purging gas & time

## SILICONE DISC SYSTEM 200

- Achieve an air tight seal in straight pipes and dome ends
- For pipe diameters between 3/4" -12"
- Purge levels achieved in under 3 minutes
- Help achieve a uniform weld profile
- Helps cut down purging gas & time

## SILICONE DISC SYSTEM 180

- Achieve an air tight seal in bend pipes and elbows.
- For pipe diameters between 3/4" -12"
- Purge levels achieved in under 3 minutes
- Help achieve a uniform weld profile
- Helps cut down purging gas & time
