

Rod Guard Cannisters & Parts

Rod Guard cannisters and accessories provide great storage for all your welding electrodes, rods and filler metals.

Rod Guard cannisters are constructed of high impact polyethylene and are certified chloride-free, they feature a threaded cap with a long lasting neoprene seal to keep electrodes airtight - preventing them from being contaminated with atmospheric moisture.

Original Cannisters

RG100 cannister holds up to 4.5 kgs of 30 cm or 35 cm electrodes. Withstands 107°C.
RG200 is designed specifically for 45 cm electrodes. Withstands 107°C
Both sizes are available in blue.

High Temperature Cannisters

RG100HT and RG200HT cannisters are steel lined and high temperature resistant to 232°C
The RG100HT holds up to 4.5 kgs of 30 cm or 35 cm electrodes.
The RG200HT designed specifically to hold 45 cm electrodes.
Both sizes are available in blue.

1metre Cannisters

Specifically designed for 1m flux coated bronze or brazing rod and TIG filler metals. The 0.25cm wall thickness is designed for added strength and durability.
When the long cap is removed, rod tips are exposed - allowing easy accessibility to cannister contents.

Built with the same commitment to quality as the original Rod Guard with the form, fit and function you've come to expect.
Available in blue.

Belt Loop

IWWS branded belt loop accessory makes convenient carrying case for cannister. Enables cannister to pivot without dumping contents.

Storage Rack

Perfect for organising up to three cannisters at the job site or workstation. Accomodates 35 cm or 45 cm cannisters. Cannisters are sold separately.

"New" #RG301 Rack for 1m cannisters.
