

Multi X Expansion Burner

The Multi X Expansion burners can be used in both 90 deg and 180 deg applications.

Preheating Steel/ Metals prior to welding applications
Preheating is crucial for welding thicker metals as it helps -

- Achieve a better weld quality
- Allows easier shaping, making the metal more malleable and less prone to cracking.
 - Improve penetration

MX50 50 mm (2") Skit expansion burner
372MJ @ 200KPA / 700mm Flame

MX76 76 mm (3") Skit expansion burner
823MJ @200KPA / 950mm Flame
